METAL SILHOUETTE ORNAMENTS

For Interior and Exterior Decorations

To be attached to the surface of chimney, gable, over doorways and fireplaces, to relieve plainess of plaster, brick or stone walls, and to give an individual and distinctive touch to your building.

All designs are reversible and are finished with three coats of best quality black paint. Holes are bored in the design, and galvanized, black headed nails are furnished with each design for attaching. All our metal silhouette ornaments are cut from 14 gauge aluminum (everlasting, non-rust metal). Their lightness makes them easy for anyone to attach to any surface.

Garden Sun Dials and Gazing Globes

Size 14" Globe Pedestal 42" **$32**

Pedestal Only **$14**

Give New Charm to Your Garden

The quiet beauty of a lawn at twilight—slender walks fringed with flowers—a blaze of red and yellow—each contributes to the ensemble of garden beauty.

GARDEN BEAUTY

But place a crystal Gazing Globe in a grassy plot, not too closely hedged by shrubs and trees. Let it mirror the moving clouds, the flight of birds, all the color and life about it—and the whole aspect of a garden receives new and exotic charm. On a graceful white pedestal, the Gazing Globe is one of the most effective touches in landscape art.

GAZING GLOBES ARE POPULAR

With the increasing popularity of Gazing Globes, and their use in some of the finest gardens in America, many are adding Sun-Dials to enhance the artistic effect and to add another point of interest in the garden. The approved type of Sun-Dial is bronze, which is mounted on a white pedestal. It is usually placed near a garden gate, between the forks of a path, or in some other accessible place. The best artistic effect, of course, is secured when the white pedestal has a background of a dark green shrubbery.

GAZING GLOBE

We are at your service. Write us on any of your special pottery requirements. If we do not manufacture it, we will be able to direct you where it may be purchased. This service does not cost you anything.

We have an interesting assortment of Gazing Globes and Sun-Dials that will enhance the beauty of your own garden—no matter how large or how small it is. The following is their range in size and price.
